OMADLI GROUP

AI Agent for Bolt Accelerator
Prepared by: Zulfiya Forsythe
Date: 06/11/2025

Overview

The AI Agent is a secure, AI-powered internal and external agent developed by Omadli Group, custom-built for the Bolt Accelerator program. It provides fast, reliable answers to user questions based on internal documents loaded into the system.
The agent is paired with a robust analytics dashboard that includes:

- An **Admin Panel**
- A **Document Manager**
- A **User Dashboard** with subscription and usage insights

The agent features a ChatGPT-style interface with ability to create chat folders and full Bolt Accelerator branding. The interface allows users to interact naturally with the AI through a branded chat panel, organize conversations in folders, and navigate with an intuitive side bar menu.

The system launches with 100 PDF files sourced from Google Drive, with new content added weekly and optional bi-monthly consolidation, all managed through the admin panel.

A built-in Stripe integration allows users to sign up and pay for access.
The User Dashboard includes visibility into:

- Who has signed up
- Who has an active subscription
- Payment history and subscription status

Key Features and Capabilities

The AI Agent has the following functions:

- Smart AI chatbot with natural language search to converse text-to-text
- Cloud storage integration
- Custom interface with client's branding
- Expandable to include future datasets
- User security role and role-based access control

The AI Agent will come with its own Analytics Dashboard:

1. Dashboard Overview

- Total user accounts
- Active subscriptions
- Total number of uploaded files
- Daily usage of metrics
- Monthly payment totals
- Yearly usage statistics
- Average response time of the agent

2. User Dashboard (Users & Subscriptions)

User list with:

- Subscription status (active/expired)
- Subscription type (monthly/lifetime)
- Subscription expiration date
- Payment history (per user)

Time spent on app (per user)

- Login history
- Chat history per user
- Payments received summary
- Lifetime subscriptions tracking

3. File Manager Dashboard

- File upload functionality
- File viewer (preview documents)
- Document organization & management

It integrates with:

- AWS
- Dropbox
- Google Drive
- Stripe

This is a sample of the AI Agent UI and will be fully customized for the Bolt Accelerator program.

This is a sample of Analytics Dashboard Panel that would be fully custom for the Bolt Accelerator AI program.

Pricing

- One-time setup fee $4,500 (implementation, migration, and model training)
- Monthly subscription, $500 (maintenance, updates, usage tracking)

Inclusions

The recurring **Monthly AI Agent Subscription** covers the following ongoing services:

- Regular AI agent maintenance includes bug fixes, security updates, and system performance monitoring to keep the platform stable and secure.
- Standard technical support during business hours for troubleshooting, usage help, and general questions.
- Incremental updates and minor feature improvements based on user feedback, ensuring the system evolves with your needs.
- Continuous data backups and disaster recovery processes are in place to protect your content and ensure rapid restoration if needed.
- Active tracking of system usage, including alerts when nearing storage or usage thresholds, so nothing catches you off guard.
- Continuous monthly support, including the ability to fine-tune and retrain the AI model to improve accuracy or adjust to new data sets or changing requirements.
- Chat history per user.

Implementation time: ~3 weeks

Exclusions

What is not included in the price:

- Tokens
- Data infrastructure

Tokens to be purchased by client.

Tokens are pieces of words or punctuation marks used by AI models. Typically, about 1,000 tokens equal around 750 English words.

For example, if an agent handles around 500 customer queries per day, and each query averages around 500 tokens (375 words), that's:

500 queries/day × 500 tokens/query = 250,000 tokens/day = approximately $0.22/day for GPT 4.1 Full and mini.

Data Infrastructure that needs to be provided by the client:

Virtual Private Server provider options:
Configuration: 2 vCPU / 8 GB RAM

1. AWS LightSail - $54/month (Most Affordable) + storage (100 GiB storage)

https://aws.amazon.com/lightsail/pricing/

2. Azure VM - $57/month + storage (100 GiB storage)

https://azure.microsoft.com/en-us/pricing/details/virtual-machines/linux/

3. GCP Compute - $77/month (Includes 100 GiB storage)

Outcomes with the AI Agent

- Faster Access to Information
  - Users get instant, reliable answers from internal files, reducing the need for manual searches or staff intervention.
- Increased Operational Efficiency
  - Time spent answering repeat questions or digging through documents is significantly reduced.
- Better User Experience for Program Participants
  - Participants have 24/7 access to support and resources via a natural language interface.
- Centralized Knowledge Management
  - All relevant files are searchable through one interface, no need to toggle between tools or folders.
- Data-Driven Decision Making
  - With the built-in analytics dashboard, admins gain insights into user activity, content engagement, and system usage patterns.
- Monetization Opportunities
  - Integrated Stripe payments allow easy subscription management and revenue tracking for paid users.
- Scalability
  - The system can grow with the program, adding new files, users, and dashboards without requiring significant rework.
- Stronger Program Branding
  - With a custom-branded UI, the agent reinforces Bolt Accelerator's identity while delivering high-tech functionality.

Case Study and Marketing Collaboration

If you find the AI Agent helpful, it will mean a lot to us if you'd consider being featured in a case study to help others understand the impact it can have.

If you are open to it, the collaboration might include:

- A short case study covering how the AI Agent was rolled out, how it's being used, and any measurable outcomes (such as saved time, fewer manual tasks, or better access to information).
- Optional but appreciated: A brief testimonial video or a co-written blog post reflecting on your experience.
- Optional: A short-written review of the product that we can share with prospective users.
